Subject: RE: Request: Local development plan site allocations (GIS shapefile format)

Hi Dawn,

In response to your query below concerning our comments on Climate Change, I can now provide you with the following information.

- 4135
- Taking a joined up approach to water management stacks up financially and is worth doing.
 - The benefits are spread among the partners in different ways depending on the specifics of the development.

- 4536
- The benefits to Severn Trent from being involved are:
 - a) We would like to be involved in situations where we have an existing problem to resolve.
 - b) We would to be an active partner in other situations – generally in situations where we gain in the future , but not necessarily immediately.
 - c) In most cases we can offer help, guidance and expertise in water management.

Hope this helps

Kind regards

Hi Dawn

The consultation has closed now but we would still value your comments, particularly related to policies related to Climate Change (which include flood risk and water). I've attached an extract for your information.

Your earliest response would be much appreciated.

Dawn

Dear Dawn,

Severn Trent Water are keen to comment on your Local Plan. In order for us to do this it would be appreciated if you could let me know the specific policy you would like us to comment on.

I look forward in hearing from you.

Regards

Dawn

Hi Elaine

Yes I think we have provided the same data to the HSE. We have consulted Severn Trent on our Local Plan Publication Version – the deadline for this is 11th March. Not sure if yourself or other colleagues will be commenting – we were provided with a generic email address for Severn Trent but any comments or observations on this would be very welcome. Let me know if you need more information on the consultation.

In the interim I'll sort out the GIS layers.

Dawn

Subject: Request: Local development plan site allocations (GIS shapefile format)

Dear Dawn

My name is Elaine Ring. I work with the Strategic wastewater infrastructure planning team at Severn Trent Water. We are currently collating data on planned growth in the Severn Trent catchment to inform our future investment plans. I am tasked with plotting site allocations from local development plans on GIS to ensure that we understand the additional sewerage capacity required to accommodate these developments and integrate this into our plans.

I was wondering if I could get your help in sourcing GIS layers for your most up to date local development plan?

Many thanks

Elaine

Response received for Horizon Factory Consultation

Dear Steve,

Further to your enquiry regarding the above development, please see my comments highlighted in red below.

5079

There are no known sewer capacity issues which are expected to be affected by the redevelopment of this site and so provided surface water is managed sustainably we do not envisage and sewer capacity constraints.

I trust this information has been useful to you.

Kind regards

Dawn

Subject: Consultation on Proposed Local Plan Site Allocation – PA86 Thane Road, Horizon Factory

Dear Sir/Madam

Consultation on Proposed Local Plan Site Allocation – PA86 Thane Road, Horizon Factory.

Nottingham City Council is preparing a new Local Plan for Nottingham. The Local Plan sets out planning policies to guide future development and allocates land for employment, housing and other uses. The City Council proposes to allocate the Horizon Factory site off Thane Road as a proposed site for future employment use, and we would welcome any comments you might have on this proposal.

Further details of the consultation can be found in the attached letter.

Please note that the deadline for receipt of comments is 5pm on Wednesday 9th November 2016.

Kind regards

Steve Ryder
